

MCS

SPACE SAVING SIDE EDGE GRINDING MACHINE

A compact, easy to use side edge grinder using a ceramic plate with belt which can be used for grinding snowboards or skis. This machine functions with the same technology that is used on the grinding robots: All-ceramic sliding shoes and ceramic abrasive belts. Edge angles are adjustable.

ADVANTAGES

- Compact size: Positioning option under the drip tray of the Crystal S/SR or Crystal Inline
- Easy angle adjustment from 87°- 89° degrees
- Extremely precise with minimum use of material – especially important for all snowboards and skis
- Ceramic grinding plate
- Grinding support adjustable in height

TECHNICAL DATA	MCS
Rated power:	max. 0.8 kW
Voltage:	3 x 400 volt / 50 Hz
Fuses:	3 x 10 A
Coolant tank volume:	25 liters
Total weight:	82 kg incl. emulsion
