# HIGH-TECH MODULE FOR RAZOR-SHARP EDGES

## INNOVATION

This innovative module means preparation of your skis genuinely becomes an experience. From those using top-of-the-range skis to professional racers, our combination of RACEfinish and GRIPtech provides unsurpassed advantages that provide a completely new level of fun and safety when out on the piste.

# A UNIQUE COMBINATION

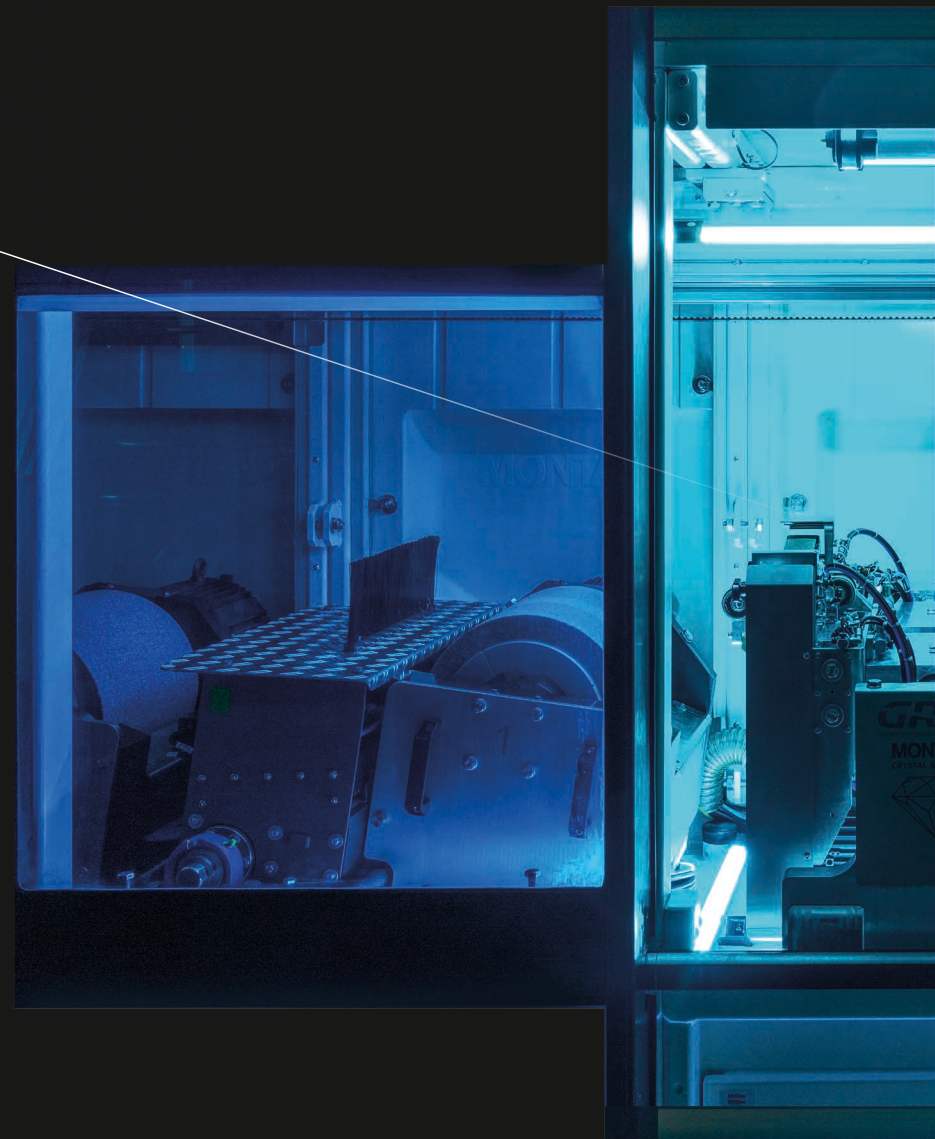

**G**RIPtech stands for ultimate grip and maximum fun on the piste. Precise grinding and a defined, even edge angle below 90° provides perfect grip and exceptional carving properties.

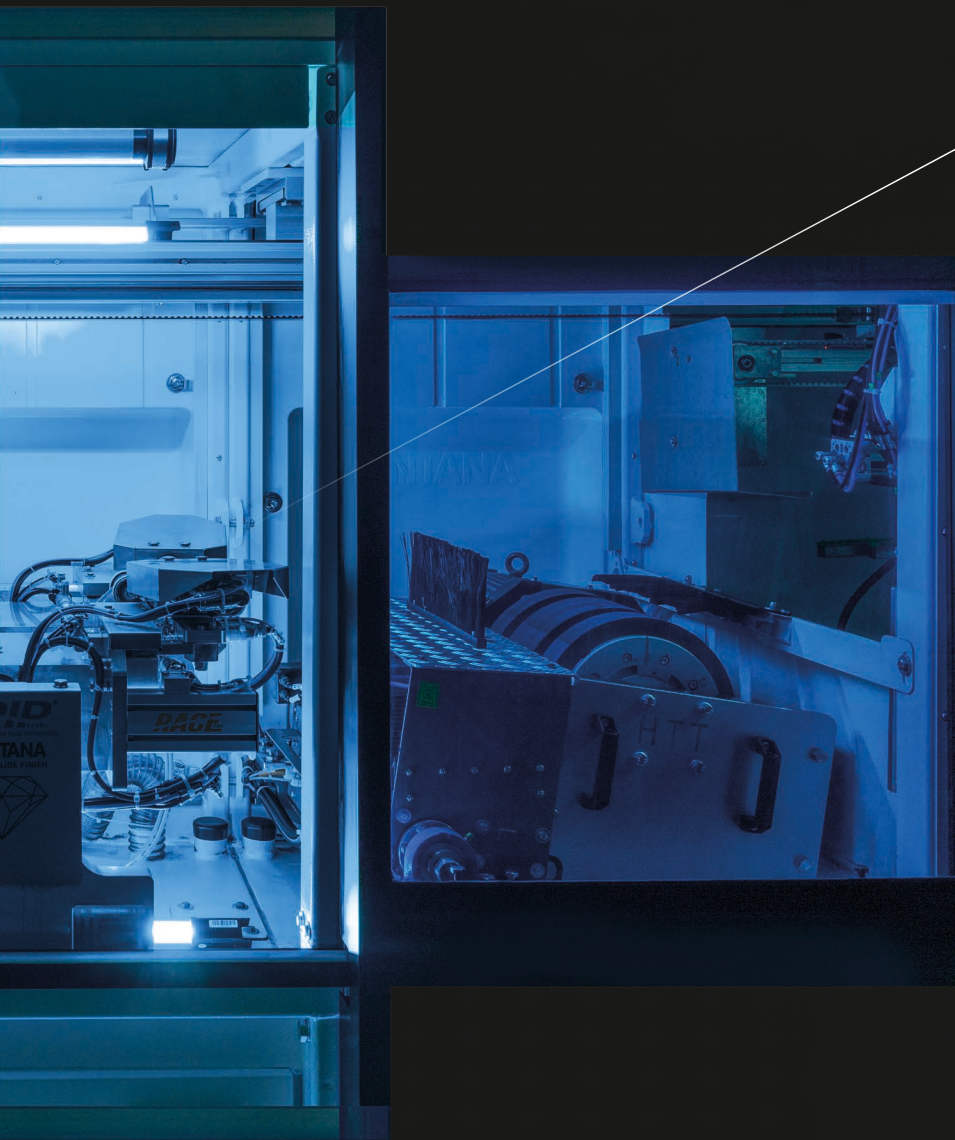

The GRIPtech system grinds vertically, resulting in precise, sharp and durable edges.

Grinds all functional areas of your sports equipment from shovel to tail in premium RaceEdge quality. The pressure curve is automatically adjusted to the geometry of the ski so that both narrow and wide waist skis receive an optimal grind. You can also adjust the pressure curve in line with your own requirements.

This process ensures the longest lasting sharpness with low abrasion. Excellent results even on corroded edges. At the same time, the GRIPtech system provides a high output and high cost efficiency.

Whether you're on skis or a snowboard, GRIPtech provides the ultimate skiing and snowboarding pleasure.

**RACE**  
*finish*

The RACEfinish is the ideal accompaniment to GRIPtech and provides a perfect finish. Your side edges are precisely polished and have a long-lasting race grind in proven RaceEdge quality. This technology comes with automatic angle adjustment, which can be saved in the formula. Get the precise result you expect, every single time.

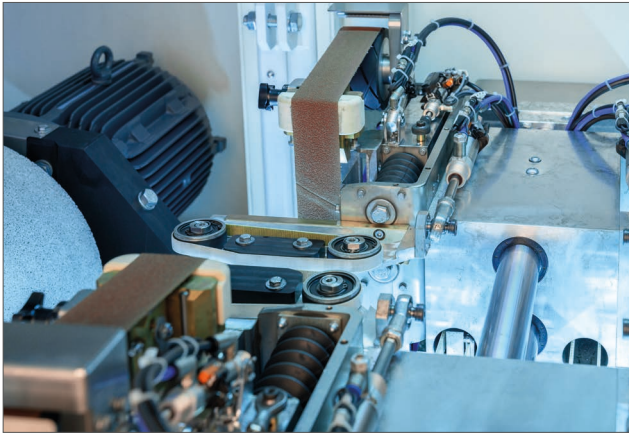

Even on icy pistes, this long-lasting edge sharpness in proven RaceEdge quality ensures excellent hold. Automatic operation and the exact grind finish of the high-speed discs ensure precise, refined edge geometry.

Two high-speed discs ensure a smooth finish free of burrs and allows for angles to be adjusted in 0.5° steps. The two polishing discs ensure an even grind finish at high speed. In this case, the functional areas of the ski are optimised.

RACEfinish takes the geometry of different types of ski into account via programmable aggregate closing times and electronically controlled pressure curves that ensure precisely defined grinding pressure on the grinding point.

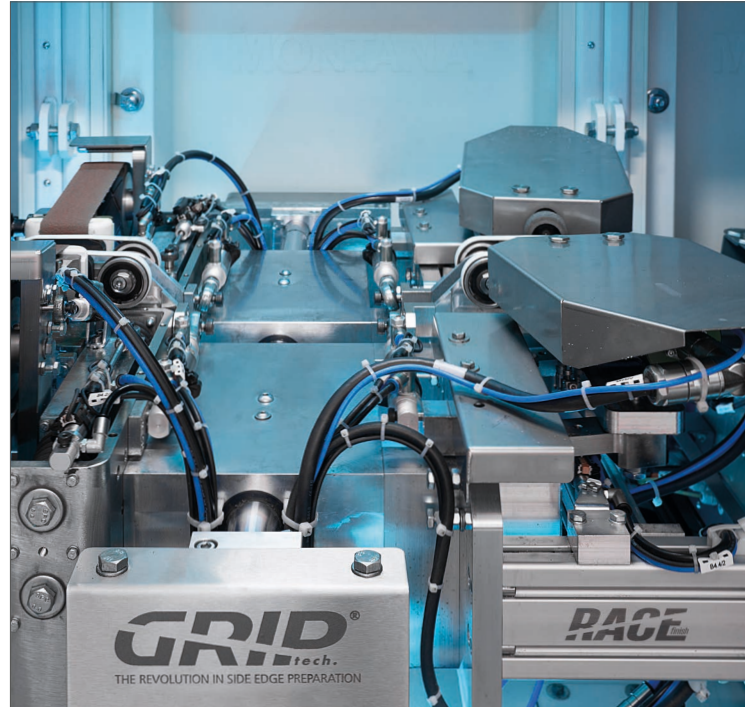

This completely burr-free and polished side edge will satisfy the most stringent requirements of all winter sports enthusiasts.

# THE DREAM COMBINATION FOR WORLD CUP EDGES

## GRIPTECH

- Defined and steady angle
- Grinds all functional areas from shovel to tail
- Longest lasting sharpness
- Grinding is gentle on the material
- High output
- Excellent results even on corroded edges
- High cost efficiency
- For skis and snowboards
- Ultimate skiing and snowboarding pleasure

## THE MODULE COMBINATION FOR PROFESSIONALS

Implementation of this unique combination means **MONTANA** is shaping the future in preparing side edges for beginners right up to professional racers.

## RACEFINISH

- Automatic angle adjustment stored in the formula
- From those using top-of-the-range skis to racers
- Long-lasting edge sharpness
- Perfect fun and safety when out on the piste
- RaceEdge quality edges
- Automatic operation
- Precise and accurate edge geometry
- Perfect hold on icy pistes

# THE ULTIMATE SKI SERVICE EXPERIENCE

Together, GRIPtech and RACEfinish provide the ultimate ski service experience. Ski geometry is accurately taken into account, whilst the edges are perfectly ground and polished. Regardless of whether you want maximum grip, carving properties or a race grind, these technologies ensure perfect fun and safety when out on the piste.

RACEfinish technology takes the geometry of different ski types into consideration via programmable aggregate closing times and electronically controlled pressure curves, that ensure precisely defined grinding pressure on the grinding point. This completely burr-free and polished side edge will satisfy the most stringent requirements of all winter sports enthusiasts.

Experience the future of ski service with the unique combination of GRIPtech and RACEfinish in our latest machine. Make your skis and snowboards perfect for unforgettable adventures on the piste.
