MCS GRIPTECH

THE COMPACT SIDE EDGE GRINDING MACHINE WITH GRIPtech

SIDE EDGE GRINDING

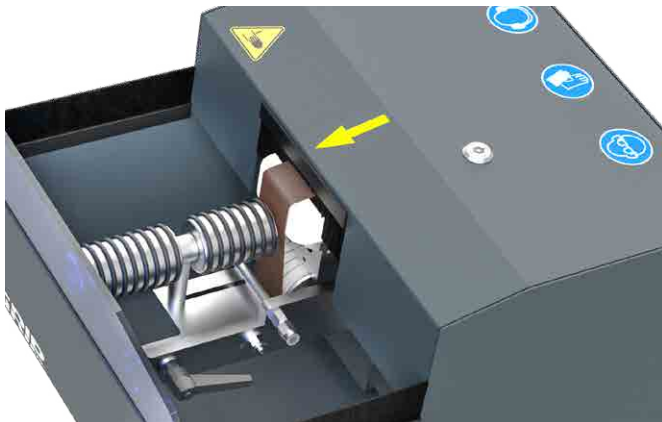

The MCS GRIPtech is a compact side edge grinding machine for skis and snowboards. Thanks to its space-saving design, it can be conveniently positioned under the drip tray of the CRYSTAL INLINE series.

The GRIPtech process produces a precise, uniform edge angle from 89° down to 86° and delivers optimal grip and clean carving performance. Vertical grinding produces sharp, long-lasting edges from tip to tail – with race-edge quality. Even corroded edges are reliably machined, minimising material removal and ensuring a long service life.

The height-adjustable ski and board holder allows flexible adjustment for different models and shapes.

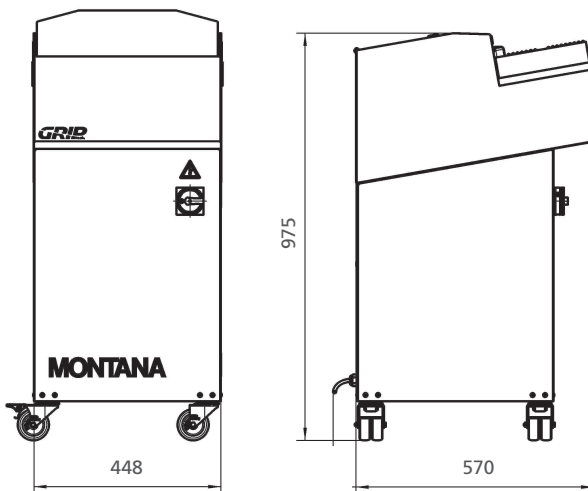

The precision, efficiency and compact design of the MCS GRIPtech make it a powerful solution for professional ski servicing.

ADVANTAGES

- Precise, uniform edge angle (89°–86°) for optimal grip and clean carving performance.
- Vertical GRIPtech grinding process for sharp, long-lasting edges in race edge quality.
- Space-saving design, ideal for integrating under the drip tray of the CRYSTAL INLINE series.
- Long service life with minimal material removal, even on corroded edges.
- Height-adjustable holder for flexible adaptation to different ski and snowboard models.

TECHNICAL DATA

Power:	max. 0.8 kW
Voltage:	3 x 220 V/60 Hz
Fuse:	3 x 16 A
Weight:	95 kg
