P-TEX SPEEDMASTER II

AUTOMATIC BASE RESOLER WITH HIGHEST CAPACITY

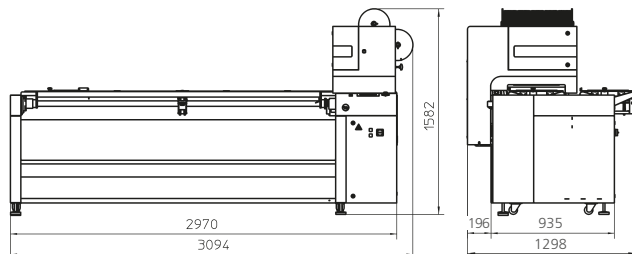

For the base repair of skis and snowboards. They can be repaired in one working operation without templates.

The capacity of > 60 per ski per hour is possible thanks to a genius loading system and no waiting times in the process.

P-TEX SPEEDMASTER II is a very efficient and economic solution because resole speed, material supply and pressure can be regulated variably.

TECHNICAL DATA	P-TEX SPEEDMASTER II
Rated power:	8.3 kW
Voltage:	3 x 400 volt, special voltage via trafo
Fuses:	3 x 12 A
Compressed air:	6 bar, 50 l/min
Total weight:	480 kg

DIMENSIONS P-TEX SPEEDMASTER II

ADVANTAGES

- The split head allows the winter sports equipment to be adjusted better, regardless of the insertion position, so that curved snowboards, for example, can be processed better.
- Preheating the equipment with an infrared lamp
- Loading with pivoting technology to avoid non operating times
- Rebase- and material transport-time and pressure can variably be regulated
- Low melting temperature i.e. no damage to base material
- Integrated smoke deductor with ventilation
- Positive resoling for best repair results
- 4-fold wire transport
- Easy operation via touch panel
- Programs can be stored for ski and board resulting in easy handling

OPTION

- Compressor
