WAXMASTER III

WAXING AND POLISHING IN A SINGLE STEP, ENERGY-EFFICIENT WITH INFRARED TECHNOLOGY

WAXING AND POLISHING

The innovative WAXMASTER III achieves efficient waxing and polishing of snowboards and skis in a single step. It is space-saving and odor-free, and continues with the proven environmental friendliness of its predecessors.

The new infrared technology heats up much faster and is therefore significantly more energy efficient than former hot air systems.

In addition to high capacity, the technology delivers a consistent finish with low wax consumption.

Thanks to the powerful AC motor, a single Schuko plug is now sufficient; three-phase power is no longer required.

The machine ensures a uniform, clean finish and offers a cost-effective, quick-to-deploy solution with reduced energy consumption.

ADVANTAGES

- Heats up quickly thanks to infrared technology, saving time and energy.
- Simple operation with a Schuko plug
- Large, heated wax roller
- Large polishing roller
- For skis and snowboards
- Even, thin wax application
- Space-saving and odor-free
- Environmentally friendly

TECHNICAL DATA

Power:	1.8 kW
Supply voltage (Europe):	230 V
Fuse (Europe):	16 A

Roller width:	350 mm
Roller diameter:	150 mm
Length:	534 mm
Width:	605 mm
Height:	309 mm
WAXMASTER weight:	60 kg
Base frame weight:	23 kg
Total weight:	83 kg
