

# A NEW ERA

THE WORLD'S FIRST DESKTOP DRILL MACHINE  
TO REPLACE ALL BINDING TEMPLATES

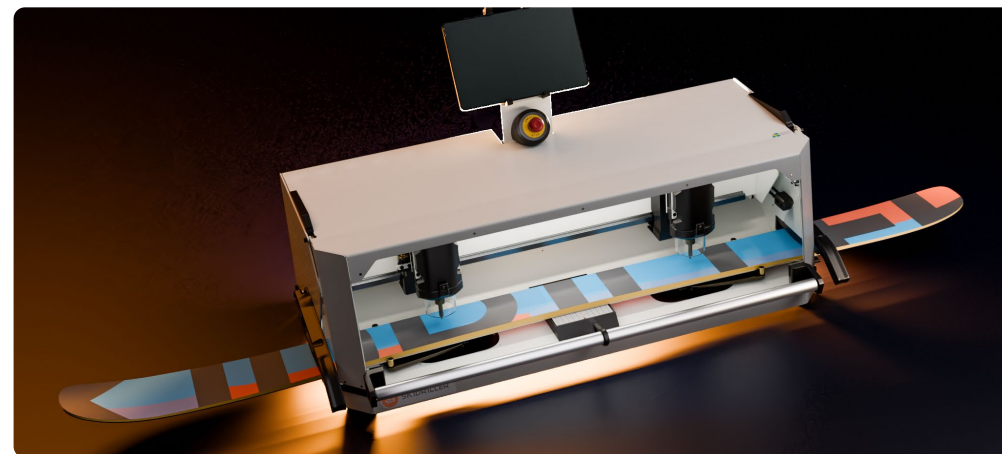

# SKIDRILLER BY NO MORE BOOTS

THE WORLD'S FIRST DESKTOP DRILL MACHINE TO REPLACE ALL BINDING TEMPLATES.

## The Traditional Drilling Process

Modern ski service workshops face increasing demands:  
new binding models, different ski geometries and limited space.  
Manual binding templates, time-consuming adjustments and potential  
sources of error are still part of everyday work for many workshops.

## The Solution: SKIDRILLER®

The result of years of development, extensive field testing and thousands of drillings: the SKIDRILLER®. The intelligent combination of software and hardware sets a new digital standard in ski drilling. Positions are precisely defined, processes are reproducible and workflows are implemented efficiently.

### Quality

High precision and perfect drill holes

### Workspace optimization

More efficient work, shorter drilling times, space-saving design

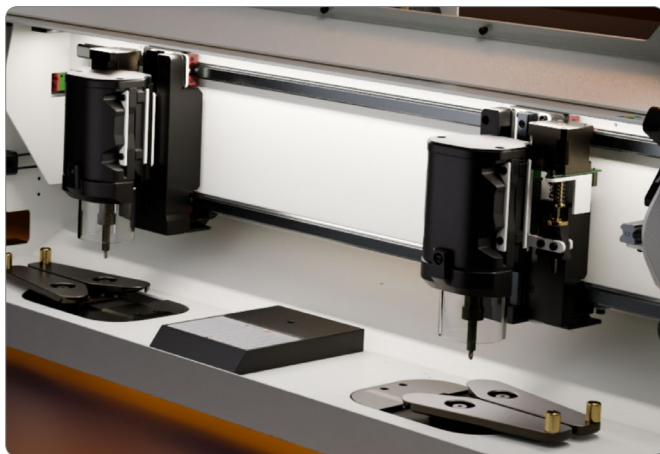

### Simplicity

Easy to learn and simple to operate

THE DIGITAL SYSTEM FOR PRECISE SKI DRILLING

# THE THREE CORE BENEFITS

DEVELOPED FOR MAXIMUM SIMPLICITY WITH HIGHEST PRECISION.

## Simplicity

No binding templates, no manual adjustments. The SKIDRILLER guides you step by step through the drilling process and simplifies daily workflows.

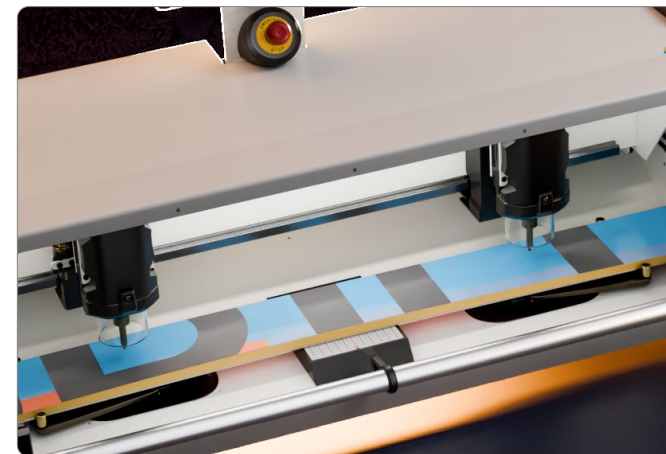

Dimensions and Weight	
Width	950 mm
Height	350 mm
Depth	414 mm
Net weight	55 kg

## Quality

Precise drill holes, reproducible results and consistently high processing quality – regardless of binding type, ski model or operator.

Components	
Drill holder	ER11
Drill bits	Ø 3,5 mm bis Ø 4,1 mm
Display	Android - Tablet

## Optimized Workflows

More efficiency in the smallest space possible. The SKIDRILLER reduces time, space requirements and complexity in daily workshop operations.

Power Supply	
Power supply unit	External DC power supply
Input voltage	DC 24 V
Power supply input	85–264 VAC, 47/63 Hz 230 VAC, 50 Hz / 1,5 A
Power supply output	24 V – 11,67 A

A NEW STANDARD IN SKI DRILLING
